## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

2. Claims 1, 4, and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. In claim 1 lines 17-18, the claim reads, "a measuring unit including a actuating rod, where a main part having preferably conical shape...", The examiner is unclear if the conical shape is a required structural limitation of the invention. The examiner recommends the claim read, "a measuring unit including a actuating rod, wherein the main part of the actuating rod has a conical shape, ...".

4. In claim 4 line 3, the claim reads, "which can be one or more of the following...". The examiner is unclear if the materials listed are a required structural limitation of the invention. The examiner recommends the claim read, "such as a metal alloy, a plastic material, a plastic composite, and/or ceramic material."

5. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then

Art Unit: 3733

narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 13 recites the broad recitation 45 to 85 mm, and the claim also recites 50 to 70 mm, which is the narrower statement of the range/limitation.

#### ***Claim Objections***

6. Claim 13 is objected to because of the following informalities: claim 13 reads, "Adaptor according to claim 10, ...". The examiner is uncertain if the claim is supposed to depend from claim 10 or be a separate independent claim. The examiner recommends the claim read as follows, "Measuring instrument according to claim 10, wherein the adaptor is characterized ...". The examiner will treat the claim as depending from claim 10 for examination purposes. Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claim 12 is rejected under 35 U.S.C. 102(b) as being anticipated by Wilson (U.S. Patent 4,987,904).

Regarding claim 12, Wilson discloses an adaptor (22) that is characterized in that the adaptor is exchangeably connected with the measuring unit of a measuring instrument and is capable of being used with an instrument as described in claim 1 of the application.

***Allowable Subject Matter***

9. Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

10. Claims 4 and 13 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

11. Claims 2, 3, and 5-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892 for cited references the examiner felt were relevant to the application.
